

Hello,

I would just like to express my opinion that whatever action to allow Voom to continue operating is the action that should be taken. Cablevision gave up on Voom, but Voom LLC is wanting to take it over and maintain a 3rd competitor in the marketplace. I am a very happy Voom customer, and would not be happy with the other satellite providers that are out there. Please do what you can to help Voom LLC be able to continue operating the Voom business which will create more competition, and better satellite businesses.
